Giclée Prints

Giclée prints are highest quality digital fine art prints using pigmented inks, archival acid-free cotton rag watercolor papers and canvas. Prints under normal lighting conditions are expected to last 100+ years with minimal fading. The Giclée process requires capturing of the original art using special large format cameras and high resolution scanners, color reproduction work and file preparation. Special effects such as brush strokes, tinting, sepia and borders can also be created.
